Hako

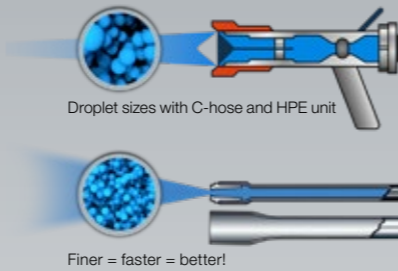

Oertzen extinguishing technology
Firefighting with high pressure

Powerful. Reliable. Excellent service.

Rapid extinguishing success with ultra-fine water atomisation

The finest water droplets significantly increase the surface area of the water and generate water vapour. This optimises the cooling effect of the water, quickly draws energy from the fire and suffocates it due to the reduced oxygen concentration. This process not only extinguishes smaller fires effectively, but also conserves resources while minimising water consumption.

Integrated water tank

The optionally integrated lightweight and compact water tank enables self-sufficient operation (capacity: 125 litres of water for up to 5 minutes of effective firefighting).

Simple operation

The user-friendly control panel make the unit extremely easy to use, so that a single person can operate it without any problems.

In-line piston pump

The high-quality pump guarantees a long service life and high operational reliability.

Integrated hose reel

Quickly ready for use thanks to the integrated hose reel with up to 100 m of hose.

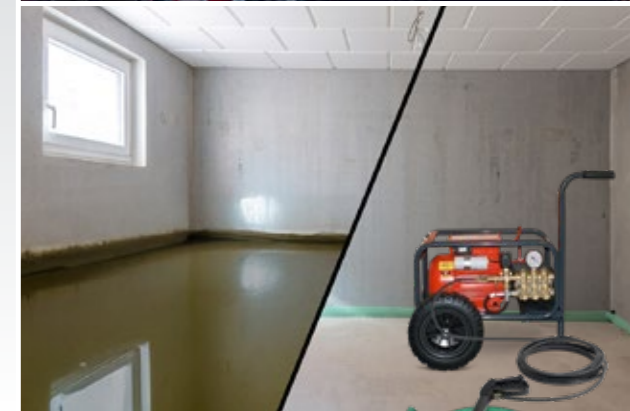

Proportioner

The integrated proportioner makes it possible to quickly add a foaming agent or use mains water.

Oertzen high-pressure cleaners: for use after firefighting missions and in civil defence and disaster control

Oertzen cold water high-pressure cleaners are ideal for the regular cleaning and maintenance of emergency vehicles as well as vehicle depots and yards. Hako Waterjet Technology also provides good service in civil defence and disaster control, for example in the provision of hot water for the decontamination of emergency hospitals or by extracting water and sludge after flooding.

Rapid extinguishing without set-up times

- Maximum machine availability and high efficiency
- Safety of emergency crews thanks to the long throw range and low recoil
- Prevention of damage caused by extinguishing water
- Foaming agents are only added when required

Full product range for all your applications

With the comprehensive programme of Oertzen cold and hot water high-pressure cleaners as well as Sweepmaster sweepers and vacuum sweepers, Hako offers the right solution for all your cleaning tasks.

Oertzen C170-9E

Oertzen H200-21 E.D

Sweepmaster 900 R

Quickly on site

From the compact mobile version to the solution that fits perfectly into the transport or emergency vehicle: Oertzen high-pressure extinguishers from Hako impress with their small installation dimensions and are so easy to transport and install that they are always quickly on site wherever needed.

The right solution for your requirements from a single source

Hotbox

Retrofit your cold water high-pressure cleaner with hot water mode. Also available as a low-pressure version for showers and other applications.

Other units

High-quality, powerful and versatile units for vehicle and equipment care. Hot water provides deep cleaning and faster drying and removes grease and oil.

Stationary units

Ideal for vehicle bays and maintenance areas. Efficient cleaning, robust and durable. Perfect for daily use.

Cold water electrical units

Flexible and powerful for use anywhere. High quality and durability for reliable, fast and thorough cleaning of vehicles and equipment.

Hako Service
Fast on site. Excellent. Safe!

Our service is available to you throughout Germany to minimise downtime and maximise efficiency.

Wide range of original accessories

Triplex

Three spray patterns in one nozzle. Switch effortlessly between fine atomisation, low expansion foam and long throw function. Fast, efficient, versatile.

Duplex

Extinguish with fine atomisation or low expansion foam. Maximum control over the spray pattern by simply swivelling. Efficient and versatile.

Water and sludge extractor

Expand your HPE application options. Pump out up to 18,000 l/h of water with a delivery head of up to 5 m and a large particle diameter. Efficient and powerful.

Medium expansion foam pipe

Medium expansion foam pipe for high-pressure extinguishing equipment: efficient firefighting with an optimum foam mixture. Ideal for professional firefighting operations. Robust and reliable.

Stabbing lance

Penetrates wood, glass and sheet metal to effectively extinguish interiors. Ideal for targeted firefighting in hard-to-reach areas. Robust and efficient.

Vario lance

Ideal for cleaning vehicles and materials. Convenient and gentle cleaning of your objects thanks to the special jet pattern. Efficient and gentle.
